All paperwork should be turned in to Sakai drop box.

**We will be monitoring your patient log cards, running a report, and checking for required patient types midway through and towards the end of the rotation. If you do not see all required patient types in clinical encounters, an alternate experience will be assigned to satisfy this requirement.*

****Direct observation surveys are done through myLUMEN. Login, select “direct observation” and follow the prompts. These should be done any time you are observed taking the history or performing heart/lung exam. This should be done on 3 separate patients. 1 history and 3 heart/lung exams are required.**

This form does not need to be turned in...it is just to help keep you organized.
